International Journal of Microwave and Millimeter-Wave Computer-Aided Engineering

Contents

VOLUME 4, 1994

Issue 1, January 1994

Special Issue:
CAD for Printed Antennas and Arrays—Part II

Editorial, 1–3
Inder J. Bahl

Guest Editorial, 4–5
Peter Hall and David Jackson

SECIAL ISSUE ARTICLES

TWO-DIMENSIONAL PATCH ARRAYS

Design of Different Configurations of Finite Microstrip Arrays of Circular Patches, 6–17
Ahmed A. Kishk and Swarajya L. Ramaraju

Moments-Method Analysis of a Finite Array of Arbitrary Shaped Microstrip Patch Radiating Elements, 18–30
Michael John Notter and Clive G. Parini

Design of Microstrip Line-Fed Patch Arrays Including Mutual Coupling, 31–42
Hung-Yu David Yang, C. Harry Chen, Jesse A. Castaneda, and William C. Wong

Numerical Analysis of a Crank-Type Antenna on a Dielectric Substrate, 43–49
Hisamatsu Nakano and Kazuhide Hirose

A Practical Design Procedure for Circularly Polarized Printed Arrays Using High Frequency CAE, 50–57
Motoyuki Naito, Koichi Ito, Shin-ichiro Matsuzawa, and Jun-ichi Takada

ANALYSIS OF MICROSTRIP AND OTHER PRINTED ANTENNAS

Use of the FDTD Method in the Design of Microstrip Antenna Arrays, 58–66
Martin L. Zimmerman and Richard Q. Lee

An Efficient Method to Calculate the Sommerfeld Integrals Concerning a Microstrip Antenna in Stratified Media: Extension of Discrete Complex Image Theory without the Optimization Process, 67–75
Xu Xiaowen and Li Shizhi

Moment Method Analysis of Linearly Tapered Slot Antennas, 76–87
Adnan Köksal and J. Frank Kauffman

Analysis and CAD Techniques for Periodic Leaky-Wave Printed Antennas: Numerical and Experimental Results, 88–99
José A. Encinar

ACTIVE PATCHES

Synthesis and Performance of an Active Microstrip Antenna, 100–110
Vincent F. Fusco, Stephen Drew, and D. Stewart McDowall

REGULAR ARTICLES

Computer-Aided Quasi-State Analysis of Coplanar Transmission Lines for Microwave Integrated Circuits Using the Finite Diference Method, 111–119
Benjamin Beker and George J. Cokkinides

MIC Simulation Column, 120–121
Coordinated by Inder J. Bahl

Call for Papers: Special Issue on Microwave Packages and Interconnects, 122

Issue 2, April 1994

Editorial, 123–124
Inder J. Bahl

Characteristics of a Cylindrical Disk-Loaded Slow-Wave Structure Found by Theoretical, Experimental, and Computational Techniques, 125–129
Thomas M. Wallett and A. Haq Qureshi

An NIC-Based Negative Resistance Circuit for Microwave Active Filters, 130–139
Stephen E. Sussman-Fort

Full-Wave Convergence Analysis of Microstrip Transmission Parameters, 140–147
James Mason Carroll and Kai Chang

CAD Compatible Accurate Models of Microwave Passive Lumped Elements for MMIC Applications, 148–162
Virender K. Sadhir, Inder J. Bahl, and David A. Willems

Quasi-Analytical Static Solution for the Generalized Boxed Coplanar Waveguide, 163–174
Enrique Drake, Francisco Medina, and Manuel Horno

A GaAsFET SPICE Model for Active Filter Tuning Purposes, 175–183
William D. Richard and Robert O. Gregory

Analysis of Coupled Anisotropic Dielectric Waveguides Using the Frequency Domain Finite-Difference Method, 184–197
Carlos Leônidas de Silva Souza Sobrinho and Attílio José Giarola

Iterative Design-Oriented Analysis Method for Class-AB High-Efficiency Microwave Power Amplifiers, 198–202
Franco Giannini, Giorgio Leuzzi, Ernesto Limiti, and Lucio Scucchia

MIC Simulation Column, 203–212
Coordinated by Inder J. Bahl

Book Review Column, 213–214
Coordinated by Ingo Wolff

Call for Papers: Special Issue on Microwave Packages and Interconnects, 215

Issue 3, July 1994

Editorial, 217–218
Inder J. Bahl

Efficient Analysis of Passive Microstrip Elements in MMICs, 219–229
Krishna Naishadham and Todd W. Nuteson

Dielectric Resonator Antennas—A Review and General Design Relations for Resonant Frequency and Bandwidth, 230–247
Rajesh K. Mongia and Prakash Bhartia

Software Verification Effort at the MIMICAD Center for Microstrip Passive Components, 248–258
Doris I. Wu and Robert J. Furlow

Application of Fault Modeling to Continuous Built-In Test (c-BIT) for Microwave and MMIC Circuits, 259–271
David L. Rhodes, Michael T. Cummings, and George F. Tempel

Compact 900-MHz Hairpin-Line Filters Using High Dielectric Constant Microstrip Line, 272–281
Protap Pramanick

Interpolation Modeling of S-Parameter Data Bases for Use in Monte Carlo Simulations, 282–296
Lowell L. Campbell and John E. Purviance

An Expansion Function Suited for Fast Full-Wave Spectral Domain Analysis of Microstrip Discontinuities, 297–306
Renato Cicchetti and Antonio Faraone

Algorithms for the Computer-Aided Design of Nonsynchronous, Noncommensurate Transmission-Line Impedance Transformers, 307–314
Stanislaw Rosloniec

MIC Simulation Column, 315–323
Coordinated by Inder J. Bahl

Issue 4, October 1994

Editorial, 325–326
Inder J. Bahl

A Rigorous Design of Millimeter-Waveguide Devices Using the 3D Finite Element Method, 327–335
Nadine Courivaud, Serge Verdeyme, Michel Aubourg, and Pierre Guillon

CAD-Oriented Formulas for the Quasi-TEM Parameters of Shielded and Semi-Enclosed (Coupled) Coplanar Waveguides, 336–348
Changhua Wan and Weigan Lin

A CAD Method Applied to the Development of Microwave Oscillators, 349–362
Bernd Roth, Axel Heitbrink, and Adalbert Beyer

Quasi-TEM Analysis of Reciprocal / Nonreciprocal Planar Lines with Polygonal Cross-Section Conductors, 363–373
Gonzalo Plaza, Francisco Mesa, and Manuel Horno

A CAD Model for Microstrips on r-Cut Sapphire Substrates, 374–383
Irina B. Vendik, Orest G. Vendik, Spartak S. Gevorgian, Margarita F. Sitnikova, and Eva Olsson

Three-Dimensional Electromagnetic Simulation of Electronic Circuits of General Shape, 384–395
Jian-X. Zheng

Low-Noise GaAs MESFET Optimization Using an Orthogonal Array Approach, 396–410
Dain C. Miller, Robert A. Sadler, and Inder J. Bahl

MIC Simulation Column, 411–431
Coordinated by Inder J. Bahl

Book Review Column, 432–433
Coordinated by Ingo Wolff

Software Review Column, 434–435
Coordinated by Ingo Wolff

Call for Papers: Special Issue on Time Domain Modeling for Microwave Components, 436

Call for Papers: Special Issue on Engineering Applications of Electromagnetic Field Solvers, 437

Index to Volume 4, 439
